DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 6-8, 10, 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Midya et al. (6,504,427)/applicant admitted Prior Art.

Regarding claims 1, 10, Midya et al. (Fig. 2) disclose a switching amplifier and correction circuitry comprising: a power stage (18); and the upper half (blocks 28-34) of the power stage (18) can be read as a digital correction circuit for providing a corrected digital pulse modulated signal to the power stage (18) as a function of the digital pulse modulated input signal and clock inputs.

Regarding claims 6, 7, Midya et al. (Fig. 2) disclose an error amplifier (30); an A/D (32); and a digital pulse corrector (34).

Regarding claims 8, 11, wherein the error amplifier discloses a multiple order error amplifier (Fig. 3).

Allowable Subject Matter

Claims 13-18 are allowed.

Art Unit: 2817

Claims 2-5, 9, 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Claims 2-5, 9, 12-18 are allowed over the prior art because none of the prior art disclosed or suggested showing the particular structure and/or operation recited in these claims namely:

Claims 2-5 call for, among others, a multiple correction modes dependent upon the duty ratio.

Claims 9, 12-18 call for, among others, a method/apparatus of sensing a saturation state of the multiple order integration process.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional references (Ruha (6,466,087); Nielsen (6,768,779)) show further analogous prior art circuitry having pulse correction.

These arts are deemed relevant and should be carefully reviews before any amendment is filed.
